

OPEYEMI BISOLA OGUNKUNLE

Operations & Data Analyst • Systems Engineering Professional

opeyemiogunkunle@outlook.com • +234-7012318936 • Lagos, Nigeria • github.com/O-peak

PROFESSIONAL SUMMARY

Analytical and detail-oriented Operations & Data Analyst with over 5 years of experience across agro-processing and oil & gas refinery environments. Holds a B.Tech in Chemical Engineering and is currently pursuing an MSc in Systems Engineering Management at the University of Lagos, where Python programming (Jupyter, Spyder, Google Colab) was applied across academic coursework. Proven ability to evaluate complex technical information, produce structured written documentation — SOPs, KPI reports, operational analyses — and communicate findings with precision and clarity. Strong STEM foundation combined with hands-on expertise in quality management systems, production planning, and data-driven decision-making; skills directly applicable to AI training, factual evaluation, and response quality assessment tasks.

CORE COMPETENCIES

- Technical Writing & SOP Development
- SAP PP Production Planning
- Advanced Microsoft Excel
- Process & Plant Commissioning
- Food Safety Standards (SON / GMP+)
- Data Analysis & KPI Reporting
- SAP Materials Management (MM)
- Python (Jupyter, Spyder, Google Colab)
- Forecasting & Demand Planning
- Cross-functional Team Coordination
- Quality Assurance & GMP+ Compliance
- SAP Master Data Management
- Linear Programming & Optimisation
- Systems Thinking & Engineering
- Inventory Reconciliation

PROFESSIONAL EXPERIENCE

Refinery Production Data Analyst

2025 – Present

PZ Wilmar Ltd · Lagos, Nigeria

- Monitor and analyse operational data across refining processes to track production efficiency, downtime, and resource utilisation.
- Generate KPI performance reports on materials usage, utilities consumption, and processing efficiency, ensuring data accuracy and actionable insights.
- Manage SAP production orders, confirmations, and reconciliation to support accurate operational reporting.
- Collaborate with engineering, supply chain, and operations teams to drive production planning and continuous process improvement.
- Produce structured written reports and data-driven operational insights presented to senior management.

Refinery Operator / Data Analyst / SAP PP Key User

2023 – 2025

Raffles Oil LFTZ (Dufil) · Lagos, Nigeria

- Monitored and controlled large-scale refining processes including palm oil and soybean processing operations.
- Generated daily operational reports using Excel and SAP systems, tracking production performance and supporting process optimisation.
- Ensured adherence to Good Manufacturing Practices (GMP) and operational safety standards across the facility.
- Served as SAP PP Key User, supporting system-level production planning and data management.

Process Commissioning Specialist – 200TPD Rice Bran Dewaxing Plant

2023

West African Soy Industries – TGI · Nigeria

- Led end-to-end commissioning of a 200-tonne-per-day Rice Bran Dewaxing Plant, overseeing the full transition from equipment installation to stable full-scale production.
- Authored all Standard Operating Procedures (SOPs) and work instructions for the plant, establishing baseline operational protocols adopted by production staff.

- Coordinated cross-functional teams across engineering, operations, and quality to ensure commissioning milestones were achieved on schedule.
- Verified process parameters, equipment performance, and safety compliance at each phase, documenting findings in structured technical reports.

Quality Management Systems Coordinator (Production)
West African Soy Industries – TGI · Nigeria

2022 – 2023

- Coordinated compliance with GMP+, SON, and food safety certification requirements across all production units.
- Developed and updated Standard Operating Procedures (SOPs), contributing to Nigeria's first GMP+ certification achievement.
- Supported quality assurance initiatives and internal audits to ensure full regulatory compliance.
- Trained 50+ production personnel on QMS standards, compliance procedures, and safety protocols.

KEY ACHIEVEMENTS

-
- ✓ Led Nigeria's first GMP+ food safety certification — West African Soy Industries (TGI)
 - ✓ Achieved 50% reduction in gas consumption through data-driven process optimisation
 - ✓ Commissioned 200TPD Rice Bran Dewaxing Plant from installation through to full production
 - ✓ Trained 50+ production personnel on QMS standards and compliance procedures
 - ✓ Recipient of the Quality Ambassador Award — TGI Group

EDUCATION

MSc Systems Engineering Management (In View)
University of Lagos

Expected 2027

B.Tech Chemical Engineering
Ladoke Akintola University of Technology (LAUTECH)

2018

TECHNICAL TOOLS & SOFTWARE

Python Jupyter Notebook, Spyder IDE, Google Colab — applied in MSc coursework (University of Lagos)

SAP SAP PP (Key User), SAP Materials Management (MM), SAP Master Data — production planning, order management & reconciliation

Microsoft Excel Advanced — dashboards, KPI reporting, operational data analysis, pivot tables, data reconciliation

Other Tools Microsoft Office Suite, Google Workspace, SOP documentation tools, QMS reporting systems, Freshdesk

RELEVANT SKILLS FOR AI TRAINING TASKS

Demonstrated ability to evaluate and produce structured, factually accurate written content across STEM, chemical engineering, food science, business operations, and quality management domains. Experienced in identifying inconsistencies in technical documentation and producing well-reasoned written analyses. Strong English communication skills honed through professional SOP authorship, KPI report writing, and postgraduate academic coursework; directly transferable to factual evaluation, response quality assessment, and RLHF training tasks.
